DFAS-CO EDI OVERVIEW

This guide is intended to provide you with finger-tip information about our EDI program. DFAS-CO uses the American National Standards Institute (ANSI) Accredited Standards Committee (ASC) X12 Transactions Sets for EDI transmission.

The Trading Partner Agreement (TPA) is a formal agreement required to exchange data electronically. It outlines the duties and responsibilities of both trading partners. A copy of the DFAS-CO TPA is printed in Section 3 of the EDI Guide.

For your convenience, a DFAS-CO EDI Registration page is included on page 3 of this guide. Contractors need only register for DFAS-CO EDI to identify MOCAS and/or SAMMS systems and transaction types **ONE TIME**.

EDI SEGMENT USAGES

“DFAS-CO Required Designator” (Req Des) denotes the requirement designator for the specific data field (element):

“M” = Mandatory per ASC X12

“R” = Required by DFAS-CO in any invoice

“O” = Optional at the discretion of the invoice originator

“C” = Conditional upon the type of invoice, contract terms, use of other related data element.

WHEN the...	THEN the...
segment “Usage” is “M”	segment is Mandatory per ASC X12
segment “Usage” is “O”	segment is Optional per ASC X12
segment is optional	“Req Des” applies only if you use that segment.
segment is optional per ASC X12, but required or conditional per DFAS-CO	notations are next to the ASC X12 requirement designator.
segment is DFAS-CO Required or Conditional	“DFAS-CO Req Des” reference determines which data elements to use.

DFAS-CO FORMAT MIN/MAX

“DFAS-CO Format Min/Max” indicates the size of the field as used by DFAS-CO. Restrictions on this indicator beyond the ASC X12 specifications are the result of limitations or specific data format requirements within the DoD mainframe applications.
