

FY2001 National Defense Authorization Act: H. Rpt. 106-945

MOCAS enhancements

The budget request included \$1.1 billion for the Defense Logistics Agency.

The House bill would authorize the budget request.

The Senate amendment would authorize an increase of \$1.2 million for improvements to the Mechanization of Contract Administration Service (MOCAS) System. The increase in funding is necessary for the development of a query tool, enhanced shared data warehouse, and other improvements to bring the MOCAS system in compliance with other provisions in the Act.

The House bill contained no similar provision and would authorize the budget request.

The conferees agree to authorize an increase of \$1.0 million for these purposes for the Defense Finance and Accounting Service.
