DFAS Employee Garners Membership in Prestigious Group

Maggie Tompkins, a technical leader at the Defense Finance and Accounting Service (DFAS) - Kansas City, was elected November 17, 2000, to a two-year term on the Oracle Development Tools User Group (ODTUG) Board of Directors

ODTUG is an independent, not-for-profit organization that aids Oracle developers in delivering reliable, high-quality information systems and influencing Oracle's strategic direction and technical development. The group currently has over 2,900 members around the world.

DFAS has begun a major initiative, the DFAS Corporate Information Infrastructure (DCII), to reengineer DoD Finance and Accounting applications. Oracle software technology plays an important role in these efforts, and Tompkins has been a leader in developing DCII capabilities.
