PRIVACY IMPACT ASSESSMENT (PIA)

PRESCRIBING AUTHORITY: DoD Instruction 5400.16, "DoD Privacy Impact Assessment (PIA) Guidance". Complete this form for Department of Defense (DoD) information systems or electronic collections of information (referred to as an "electronic collection" for the purpose of this form) that collect, maintain, use, and/or disseminate personally identifiable information (PII) about members of the public, Federal employees, contractors, or foreign nationals employed at U.S. military facilities internationally. In the case where no PII is collected, the PIA will serve as a conclusive determination that privacy requirements do not apply to system.

c. Describe the purpose of this DoD information system or electronic collected in the system. CMS is a management tool system used for tracking, resolving, and re-				
cases or inquiries. Army and Defense Finance and Accounting Service (DFAS) Customer Care Centers (CCC) which are comprised of Military Pay (MilPay) and Commercial Pay (ComPay) use this information system. Army CMS users are located at various locations in the United States and outside the continental United States. DFAS CCCs are primarily located at Cleveland, OH; Indianapolis, IN; Columbus, OH; and Rome, NY.				
CMS case management provides a single source of information for monitoring military pay problems in a timely and efficient manner, to include providing visibility to appropriate levels of management, permitting feedback to service members, and facilitating the identification of problem trends.				
CCCs use CMS for tracking active/retired military and vendor customer inquiries through to their resolution. Occasionally, the inquiries will require research within the Department of Defense (DoD) Component and other DoD Components, as noted in section h. below, that use the Social Security Number (SSN) as unique identifiers.				
The Army utilizes CMS as an all services, fully-integrated, single-source system for monitoring pay problems, uploading and tracking cases at all levels, providing immediate feedback to service members, monitoring timeliness, efficiency, and identification of problem trends.				
The Personally Identifiable Information (PII) in this system consists of birth date, child information, citizenship, disability information, DoD Identification (ID) number, driver's license, education information, employment information, financial information, gender/gender identification, home/cell phone, legal status, mailing/home address, marital status, medical information, military records, mother's middle/maiden name, name(s), official duty address, official duty telephone phone, other ID number, personal e-mail address, photo, place of birth, position/title, race/ethnicity, rank/grade, security information, SSN (full or in any form), work e-mail address, and spouse information.				
d. Why is the PII collected and/or what is the intended use of the PII? (e. administrative use)	g., verification, identification, authentication,	data matching, mission-related use,		
Identification, verification, and data matching.				
e. Do individuals have the opportunity to object to the collection of their PII?				
(1) If "Yes," describe the method by which individuals can object to the collection of PII.				
(2) If "No," state the reason why individuals cannot object to the collection of PII.				
(2) i. 1.6, State the reason why manuals cannot object to the collection of				

Overall the CMS does not collect PII directly from the individual. The Army receives PII concerning their work through an automated process. The CCC is the only user within CMS that requests PII from the callers to start a request. If a caller objects to giving their SSN									
then the Customer Service Representative (CSR) either logs the call under a miscellaneous tracking number or ends the call. In most cases,									
the CSR uses the SSN to accurately retrieve data from various other systems.									
f. Do individuals have the opportunity to consent to the specific uses of their PII? X Yes No									
(1) If "Yes," describe the method by which individuals can give or withhold their consent.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)

m. What is the authority to collect information? A Federal law or Executive Order must authorize the collection and maintenance of a system of records. For PII not collected or maintained in a system of records, the collection or maintenance of the PII must be necessary to discharge the requirements of a statue or Executive Order.
(1) If this system has a Privacy Act SORN, the authorities in this PIA and the existing Privacy Act SORN should be similar.(2) If a SORN does not apply, cite the authority for this DoD information system or electronic collection to collect, use, maintain and/or disseminate PII. (b) If direct statutory authority or an Executive Order does not exist, indirect statutory authority may be cited if the authority requires the operation or administration of a program, the execution of which will require the collection and maintenance of a system of records.
(c) If direct or indirect authority does not exist, DoD Components can use their general statutory grants of authority ("internal housekeeping") as the primary authority. The requirement, directive, or instruction implementing the statute within the DoD Component must be identified.
