

# 810 Invoice

Functional Group ID=**IN**

## Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Invoice Transaction Set (810) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the billing for goods and services provided.

## Notes:

1. This implementation convention was developed for use by the Department of Defense (DoD) for use in the initial stages of its electronic commerce/electronic data interchange (EC/EDI) program.
2. Use this implementation convention to either make a request for a progress payment, Performance Based Payment or Contract Item Financing payment, to correct a previously submitted request for a progress payment, Performance Based Payment or Contract Item Financing payment, to submit a request to withdraw without actions, a previously submitted request for payment.
3. Use one iteration of this transaction set to make one request for a progress payment, Performance Based Payment, or Contract Item Financing payment or to request a withdrawal, or to submit a corrected request for a progress payment, Performance Based Payment, or Contract Item Financing payment.
4. All amounts contained in a transmission are to be generated by the application program originating the data. No amounts will be calculated by the receiving application program. This means that if a line of data is the result of a calculation (e.g., add line " " and line " " together and carry the result of the addition on line " "), the amounts on all three lines must be carried in the transaction set.
5. This Implementation Convention was initially based on converting Standard Form (SF) 1443 Progress Payment to EDI.

## Transaction Set Notes

1. The QTY segment is used to specify a quantity of units which are expected as payments, e.g., trade-ins or returns.
2. Number of line items (CTT01) is the accumulation of the number of IT1 segments. If used, hash total (CTT02) is the sum of the value of quantities invoiced (IT102) for each IT1 segment.

**Segment:** **N1** Name  
**Position:** 070  
**Loop:** N1 Optional  
**Level:** Heading  
**Usage:** Optional  
**Max Use:** 1  
**Purpose:** To identify a party by type of organization, name, and code  
**Syntax Notes:** 1 At least one of N102 or N103 is required.  
2 If either N103 or N104 is present, then the other is required.

**Semantic Notes:**  
**Comments:** 1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.  
2 N105 and N106 further define the type of entity in N101.

**Notes:** 1. There must be three iterations of this segment when transmitting an original or corrected request for progress payment. One iteration will indicate the contractor [the party transmitting the request for progress payment (e.g., N101 will cite either code 21 when the contractor is a small business, or code SE when other than a small business)]; one iteration will indicate the contracting office [the contract administration office (e.g., N101 will cite C4)]; and, one iteration indicating the paying office (e.g., N101 will cite code PR). The payment office address is not transmitted in a withdrawal of a previously submitted request for progress payment.  
2. The name and address of the contractor will be transmitted as it appears in the contract against which the progress payment is being requested. Do not substitute any other name or address for the one that appears in the contract.

- 1 Element 235/234 combinations should be interpreted to include products and/or services. See the Data Dictionary for a complete list of IDs.
  - 2 IT106 through IT125 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

- Notes:**
1. Use in all original and resubmitted requests for progress payments, performance-based payments, and commercial item financing payments. Do not use in a withdrawal.
  2. Use the first iteration to transmit the amount eligible for the progress payment cited on line 19 on the SF1443.
  3. For progress payments, if line 25 is present on the SF 1443, cite the applicable data on the second iteration.
  4. For progress payments, use the third iteration to cite line 26.
  5. For progress payments, use the forth iteration to cite line 27.
  6. When request is for Foreign Military Sales (FMS), use subsequent iteration to convey data related to a foreign military sale.
  7. Transmit subsequent iterations when contracts require the dollar value applied against the applicable ACRNs.
  8. For performance-based payments and commercial item financing payments, use the IT1 loop to indicate the CLIN and the SLN loop to indicate all information related to the CLIN cited.
