810 Invoice

Functional Group ID=IN

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Invoice Transaction Set (810) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the billing for goods and services provided.

Notes:

- 1. This implementation convention was developed for use by the Department of Defense (DoD) for use in the initial stages of its electronic commerce/electronic data interchange (EC/EDI) program.
- 2. Use this implementation convention to either make a request for a progress payment, Performance Based Payment or Contract Item Financing payment, to correct a previously submitted request for a progress payment, Performance Based Payment or Contract Item Financing payment, to submit a request to withdraw without actions, a previously submitted request for payment.
- 3. Use one iteration of this transaction set to make one request for a progress payment, Performance Based Payment, or Contract Item Financing payment or to request a withdrawal, or to submit a corrected request for a progress payment, Performance Based Payment, or Contract Item Financing payment.
- 4. All amounts contained in a transmission are to be generated by the application program originating the data. No amounts will be calculated by the receiving application program. This means that if a line of data is the result of a calculation (e.g., add line "" and line "" together and carry the result of the addition on line "", the amounts on all three lines must be carried in the transaction set.
- 5. This Implementation Convention was initially based on converting Standard Form (SF) 1443 Progress Payment to EDI.

Transaction Set Notes

- 1. The QTY segment is used to specify a quantity of units which are expected as payments, e.g., trade-ins or returns.
- 2. Number of line items (CTT01) is the accumulation of the number of IT1 segments. If used, hash total (CTT02) is the sum of the value of quantities invoiced (IT102) for each IT1 segment.

Segment: ST Transaction Set Header

Position: 010

Loop:

Level: Heading Usage: Mandatory

Max Use:

Purpose: To inc

To indicate the start of a transaction set and to assign a control number

Syntax Notes: Semantic Notes:

1 The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

Comments:

Segment: BIG Beginning Segment for Invoice

Position: 020

Loop:

Level: Heading Usage: Mandatory

Max Use:

Purpose: To indicate the beginning of an invoice transaction set and transmit identifying numbers

and dates

Syntax Notes: Semantic Notes:

1 BIG01 is the invoice issue date.

2 BIG03 is the date assigned by the purchaser to purchase order.

3 BIG10 indicates the consolidated invoice number. When BIG07 contains code CI,

BIG10 is not used.

Comments: 1 BIG07 is used only to further define the type of invoice when needed.

Data Element Summary

			Data Element Summary		
	Ref.	Data			
	Des.	Element	<u>Name</u>	<u>Attrib</u>

			the thirteen (13) position alpha-numeric contract or purch Do not use spaces or dashes () between the characters.	ase orde	r number.

SF1443.

BIG05 328 Release Number O AN 1/30

Number identifying a release against a Purchase Order previously placed by the parties involved in the transaction

Use, as applicable, to cite the four (4) alpha-numeric characters of a call or order number (SPIIN). Transmission of the call or order number is required if a call or order number is applicable to the procurement action. See Block 4 of the SF1443.

BIG06 327 Change Order Sequence Number

O AN 1/8

Number assigned by the orderer identifying a specific change or revision to a previously transmitted transaction set

May use to indicate a modification number to either the contract or purchase order, or a call or delivery order when made against an indefinite type of purchase instrument. The number may be a six-position alpha-numeric "P" or "A" modification number (e.g., P00001, A00001, etc.), or when made to an indefinite instrument, a two-position number (e.g., AA). See Block 4 of the SF1443.

Must Use BIG07 640 Transaction Type Code

O ID 2/2

Code specifying the type of transaction

CO Corrected

Use to indicate a replacement invoice using the same invoice number as a previously submitted invoice. When used, the replacement invoice will overwrite the original invoice in the receiving data base.

PA Progress Payment Invoice

PB Partial Bill

Use to indicate a Performance Based Payment.

RQ Request

Use to indicate a commercial item financing invoice.

WD Withdrawal

Use to indicate a contractor generated withdrawal of previously submitted and rejected request for Progress Payment, PerformanceBased Payment or Commercial Item Financing Payment. Use only after the submission and receipt of the acknowledgment of receipt (by means of a 997 transaction set), by the DoD. Do not use when the originally submitted request for a Progress Payment, Performance Based Payment, or Commercial Item Financing Payment was rejected.

Must Use BIG08 353 Transaction Set Purpose Code

O ID 2/2

Code identifying purpose of transaction set

00 Original

Use to indicate the submission of the original request for Progress Payment, Performance Based Payment, or Commercial Item Financing Payment.

01 Cancellation

Use to indicate a contractor generated withdrawal of previously submitted request for Progress Payment, Performance Based Payment, or Commercial Item Financing Payment. Use only after the submission and receipt of the acknowledgment of receipt (by means of a 997 transaction set), by the DoD. Do not use when the originally submitted request for a

				progress payment/Performance Based Payment was rejected.
			05	Replace
				Use to indicate a replacement invoice using the same invoice number as a previously submitted invoice. When used, the replacement invoice will overwrite the original invoice in the receiving data base.
	BIG09	306	Action Code	O ID 1/2
			Code indicating typ	pe of action
			F	Final
			Z	Mutually Defined
				Use to indicate the first progress payment submitted on a contract.
Not Used	BIG10	76	Invoice Number	O AN 1/22

Segment: NTE Note/Special Instruction

Position: 030

Loop:

Level: Heading Usage: Optional Max Use: 100

Purpose: To transmit information in a free-form format, if necessary, for comment or special

instruction

Syntax Notes: Semantic Notes:

Comments:

1 The NTE segment permits free-form information/data which, under ANSI X12 standard implementations, is not machine processable. The use of the NTE segment should therefore be avoided, if at all possible, in an automated environment.

Segment: N1 Name

Position: 070

Loop: N1 Optional

Level: Heading Usage: Optional

Max Use:

Purpose: To identify a party by type of organization, name, and code

Syntax Notes: 1 At least one of N102 or N103 is required.

If either N103 or N104 is present, then the other is required.

Semantic Notes: Comments:

1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2 N105 and N106 further define the type of entity in N101.

Notes:

Ref.

Data

- 1. There must be three iterations of this segment when transmitting an original or corrected request for progress payment. One iteration will indicate the contractor [the party transmitting the request for progress payment (e.g., N101 will cite either code 21 when the contractor is a small business, or code SE when other than a small business)]; one iteration will indicate the contracting office [the contract administration office (e.g., N101 will cite C4)]; and, one iteration indicating the paying office (e.g., N101 will cite code PR). The payment office address is not transmitted in a withdrawal of a previously submitted request for progress payment.
- 2. The name and address of the contractor will be transmitted as it appears in the contract against which the progress payment is being requested. Do not substitute any other name or address for the one that appears in the contract.

Use to indicate the agency, organization, or activity

that is to receive the electronic invoice.

Segment: FA1 Type of Financial Accounting Data

Position: 290

Loop: FA1 Optional

Level: Heading Usage: Optional

Max Use:

Purpose: To specify the organization controlling the content of the accounting citation, and the

purpose associated with the accounting citation

Syntax Notes: Semantic Notes:

1 FA101 Identifies the organization controlling the assignment of financial accounting information.

2 FA102 Identifies the purpose of the accounting allowance or charge information.

Comments:

Notes: Use the FA1/FA2 loop to cite the Long Line of Accounting (LOA) or Accounting Classification Reference Number (ACRN) when required by the contract.

	Data Element Summary								
M	Ref. <u>Des.</u> FA101	Data Element 559	Name Agency Qualifier (Code Attributes M ID 2/2					
			Code identifying the	e agency assigning the code values					
			DD	Department of Defense					
			DF	Use as the department indicator for all invoices submitted to DoD legacy finance systems. Department of Defense (DoD)					
				Use to indicate that the Component originating the funds is a Department of Defense agency, including DLA.

when the individual components of the LOA cannot be generated by the application. When used, provide the balance of the financial accounting data, which should include the Accountable Station Number, identified by the use of code L1 in another iteration of this segment.

M FA202 1195 Financial Information Code M AN 1/80

Code representing financial accounting information

IT1 Baseline Item Data (Invoice) **Segment:**

Position:

Loop: IT1 **Optional**

Level: Detail Usage: Optional

Max Use:

Purpose: To specify the basic and most frequently used line item data for the invoice and related transactions

Syntax Notes:

- If any of IT102 IT103 or IT104 is present, then all are required.
- If either IT106 or IT107 is present, then the other is required.
- 3 If either IT108 or IT109 is present, then the other is required.
- 4 If either IT110 or IT111 is present, then the other is required.
- 5 If either IT112 or IT113 is present, then the other is required.
- If either IT114 or IT115 is present, then the other is required.
- If either IT116 or IT117 is present, then the other is required.
- If either IT118 or IT119 is present, then the other is required. 8
- If either IT120 or IT121 is present, then the other is required.
- If either IT122 or IT123 is present, then the other is required.
- If either IT124 or IT125 is present, then the other is required.

Semantic Notes: Comments:

- IT101 is the purchase order line item identification. 1
- Element 235/234 combinations should be interpreted to include products and/or services. See the Data Dictionary for a complete list of IDs.
- IT106 through IT125 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

Notes:

- 1. Use in all original and resubmitted requests for progress payments, performance-based payments, and commercial item financing payments. Do not use in a withdrawal.
- 2. Use the first iteration to transmit the amount eligible for the progress payment cited on line 19 on the SF1443.
- 3. For progress payments, if line 25 is present on the SF 1443, cite the applicable data on the second iteration.
- 4. For progress payments, use the third iteration to cite line 26.
- 5. For progress payments, use the forth iteration to cite line 27.
- 6. When request is for Foreign Military Sales (FMS), use subsequent iteration to convey data related to a foreign military sale.
- 7. Transmit subsequent iterations when contracts require the dollar value applied against the applicable ACRNs.
- 8. For performance-based payments and commercial item financing payments, use the IT1 loop to indicate the CLIN and the SLN loop to indicate all information related to the CLIN cited.

Data Element Summary

	Ref.	Data		
	Des.	Element	<u>Name</u>	<u>Attributes</u>
Must Use	IT101	350	Assigned Identification	O AN 1/20

Alphanumeric characters assigned for differentiation within a transaction set

1. For Progress Payment, cite the number "19" on the first iteration.

- 2. For Progress Payment, cite the number "25" on the second iteration if the maximum amount permissible is presented on line 25 of the SF1443.
- 3. For Progress Payments, cite the number '26' to indicate Progress Payment amount, which is the lesser of lines 19 and 25.
- 4. For Progress Payments, cite the number '27' to indicate government approved amount.
- 5. For Foreign Military Sales, cite the word 'FMS' in the next iteration of the IT1 segment.
- 6. For progress payments, if amounts are to be applied against the Contract Line Item Number/Sub Contract Line Item Number (CLIN/SLIN), cite the word "CLIN" in the next iterations of the IT1 segment.
- 7. For all payments, cite the word "ACRN" if amounts are to be applied against the Accounting Classification Reference Number (ACRN) in the next iteration of the IT1 segment.
- 8. For performance-based payments and commercial item financing payments, cite the actual CLIN number.

Must Use IT102

358 Quantity Invoiced

X R 1/10

Number of units invoiced (supplier units)

1. Cite the number '1' to satisfy ASC X12 syntax requirements.

Must Use IT103 355

Unit or Basis for Measurement Code

X ID 2/2

Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

Must use to satisfy ASC X12 syntax requirements.

EA Each

Always use this code to satisfy ASC X12 syntax requirements.

IT104 212 Unit Price

X R 1/17

Price per unit of product, service, commodity, etc.

- 1. Use to indicate the dollar amount of the line item number or the ACRN FMS amount.
- 2. Use to indicate the total dollar amount equal to the sum of the events or commercial item financing lines associated with the CLIN indicated in IT101.
- 3. For progress payments, do not transmit either decimal point or cents. If cents are included in the amount, round them up to the nearest whole dollar. For example, if the amount is \$10.01, round it up to \$11. Do not use commas when transmitting dollar amount greater than \$999. For example 1,000 should be transmitted as 1000.

- **6** SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.
- 7 SAC16 is used to identify the language being used in SAC15.

Comments:

- 1 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.
- 2 In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to as "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" Dollars in SAC09.

Segment: SLN Subline Item Detail

Position: 200

Loop: SLN Optional

Level: Detail
Usage: Optional

Max Use:

Purpose: To specify product subline detail item data

Syntax Notes: 1 If either SLN04 or SLN05 is present, then the other is required.

- 2 If SLN07 is present, then SLN06 is required.
- 3 If SLN08 is present, then SLN06 is required.
- 4 If either SLN09 or SLN10 is present, then the other is required.
- 5 If either SLN11 or SLN12 is present, then the other is required.
- **6** If either SLN13 or SLN14 is present, then the other is required.
- 7 If either SLN15 or SLN16 is present, then the other is required.
- 8 If either SLN17 or SLN18 is present, then the other is required.
- **9** If either SLN19 or SLN20 is present, then the other is required.
- **10** If either SLN21 or SLN22 is present, then the other is required.
- 11 If either SLN23 or SLN24 is present, then the other is required.
- 12 If either SLN25 or SLN26 is present, then the other is required.
- 13 If either SLN27 or SLN28 is present, then the other is required.

Semantic Notes:

- 1 SLN01 is the identifying number for the subline item.
- 2 SLN02 is the identifying number for the subline level. The subline level is analogous to the level code used in a bill of materials.
- 3 SLN03 is the configuration code indicating the relationship of the subline item to the baseline item.
- 4 SLN08 is a code indicating the relationship of the price or amount to the associated segment.

Comments:

- 1 See the Data Element Dictionary for a complete list of IDs.
- 2 SLN01 is related to (but not necessarily equivalent to) the baseline item number. Example: 1.1 or 1A might be used as a subline number to relate to baseline number 1.
- 3 SLN09 through SLN28 provide for ten different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

Notes:

- 1. Use in all original and resubmitted requests for progress payments, performance-based payments, and commercial item financing payments. Do not use in a withdrawal.
- 2. For progress payments use to transmit the country code for FMS request or ACRN, CLIN/SLIN level data.
- 3. When a progress payment request contains both United States (US) and FMS requirements, the progress rate is the same for both, there must be two separate iterations of the SLN segment, one to transmit the US data and one to transmit the FMS data.
- 4. For performance based payments and commercial item financing payments, use single or multiple iterations of the SLN segment to convey associated data to IT101, to include FMS country code, ACRN, or event level data.
- 5. For performance based payments and commercial item financing payments, if the ACRN dollar value is the same as the event cited in SLN02, use the REF segment to indicate the ACRN.

Data Element Summary

Ref. Data

M	<u>Des.</u> SLN01	Element 350	Name Assigned Identification	Attributes M AN 1/20
			Alphanumeric characters assigned for differentiation within	a transaction set
			1. For progress payments, when "19", "25", "FMS", or a expressed in the IT101, repeat the value.	ACRN, is
			2. For progress payments, when "CLIN" is expressed in the actual CLIN/SLIN.	he IT101, indicate
			3. When SLN01 cites the expression 'ACRN', SLN02 mus actual Accounting Classification Reference Number and the contain the amount charged to the ACRN.	
			4. For performance based-payments and commercial item payments, repeat the value expressed in IT101.	
Must Use	SLN02	350	Assigned Identification	O AN 1/20
			Alphanumeric characters assigned for differentiation within	
			1. For progress payments, when the ''19'' is expressed in a indicate the line item number on the SF1443 for which the being transmitted. Use only the number 9 through 18.	
			2. For progress payments, when "25" is expressed in IT10 indicate the line item number on the SF1443 for which the being transmitted. Use only the number 20 through 24.	
			3. When "FMS" is expressed in IT101/SLN01, indicate th	ne country code.
			4. For progress payments, when the actual CLIN/SLIN is SLN01, cite the ACRN value.	expressed in the
			5. Use to indicate ACRN value when "ACRN" is expresse IT101/SLN01.	d in
			6. For performance-based payments and commercial item payments, use to indicate event number or commercial item number.	
M	SLN03	662	Relationship Code	M ID 1/1
			Code indicating the relationship between entities	
			Use only to satisfy the ASC X12 syntax requirements.	
			I Included	
			Always use this code to satisfy the ASC requirements.	
Must Use	SLN04	380	Quantity	X R 1/15
			Numeric value of quantity	
			1. For progress payments, cite the number 1 to satisfy the requirements. Use to indicate when invoice cites the perce of weeks applicable to the subline.	
			2. For performance based payments and commercial item actual quantity of the line item.	financing cite the
			3. If quantity is expressed as a percentage, cite' P1' in SL	
			4. If quantity is expressed in weeks, cites 'WK' in SLN0.	5

Must Use	SLN05	C001	Composite Unit of Measure	X
			To identify a composite unit of measure (See Figure of use)	es Appendix for examples
M	C00101	355	Unit or Basis for Measurement Code	M ID 2/2
			Code specifying the units in which a value is being exwhich a measurement has been taken	
			Must use to satisfy the ASC X12 syntax requirement	
			Refer to 004010 Data Element Dictionary for accepta	ble code values.

REF Reference Identification **Segment:**

Position: 210

> Loop: SLN Optional

Level: Detail Usage: Optional Max Use:

1

Purpose: To specify identifying information

Syntax Notes: At least one of REF02 or REF03 is required.

- 2 If either C04003 or C04004 is present, then the other is required.
- 3 If either C04005 or C04006 is present, then the other is required. REF04 contains data relating to the value cited in REF02.

Semantic Notes: Comments:

Notes:

In Performance Based Payments, use segment to identify line condition. This condition determines if the line item in this loop is "sequential," which must be paid in

order, or "serviceable," which can be paid in any order.

Loop: SLN Optional

Level: Detail
Usage: Optional
Max Use: 25

Purpose: To request or identify a service, promotion, allowance, or charge; to specify the amount

or percentage for the service, promotion, allowance, or charge

Syntax Notes: 1 At least one of SAC02 or SAC03 is required.

- 2 If either SAC03 or SAC04 is present, then the other is required.
- 3 If either SAC06 or SAC07 is present, then the other is required.
- 4 If either SAC09 or SAC10 is present, then the other is required.
- 5 If SAC11 is present, then SAC10 is required.
- **6** If SAC13 is present, then at least one of SAC02 or SAC04 is required.
- 7 If SAC14 is present, then SAC13 is required.
- **8** If SAC16 is present, then SAC15 is required.

Semantic Notes:

- 1 If SAC01 is "A" or "C", then at least one of SAC05, SAC07, or SAC08 is required.
- 2 SAC05 is the total amount for the service, promotion, allowance, or charge. If SAC05 is present with SAC07 or SAC08, then SAC05 takes precedence.
- 3 SAC08 is the allowance or charge rate per unit.
- 4 SAC10 and SAC11 is the quantity basis when the allowance or charge quantity is different from the purchase order or invoice quantity.

 SAC10 and SAC11 used together indicate a quantity range, which could be a dollar
 - amount, that is applicable to service, promotion, allowance, or charge.
- **5** SAC13 is used in conjunction with SAC02 or SAC04 to provide a specific reference number as identified by the code used.
- **6** SAC14 is used in conjunction with SAC13 to identify an option when there is more than one option of the promotion.
- 7 SAC16 is used to identify the language being used in SAC15.

Comments:

- 1 SAC04 may be used to uniquely identify the service, promotion, allowance, or charge. In addition, it may be used in conjunction to further the code in SAC02.
- 2 In some business applications, it is necessary to advise the trading partner of the actual dollar amount that a particular allowance, charge, or promotion was based on to reduce ambiguity. This amount is commonly referred to as "Dollar Basis Amount". It is represented in the SAC segment in SAC10 using the qualifier "DO" Dollars in SAC09.

FA1 Type of Financial Accounting Data **Segment:**

Position: 350

> FA1 Loop: Optional

Level: Detail Usage: **Optional**

Max Use:

Purpose: To specify the organization controlling the content of the accounting citation, and the

purpose associated with the accounting citation

Syntax Notes: Semantic Notes:

FA101 Identifies the organization controlling the assignment of financial accounting information.

FA102 Identifies the purpose of the accounting allowance or charge information.

Comments:

Use the FA1/FA2 loop to cite the Long Line of Accounting (LOA) or Accounting **Notes:** Classification Reference Number (ACRN) when required by the contract.

			Data Elem	ent Summary
M	Ref. <u>Des.</u> FA101	Data Element 559	Name Agency Qualifier (Attributes M ID 2/2
141	FAIUI	337		e agency assigning the code values
			DD	Department of Defense
			DF	Use as the department indicator for all invoices submitted to DoD legacy finance systems. Department of Defense (DoD)
				Use to indicate that the Component originating the funds is a Department of Defense agency, including DLA.
			DN	Department of the Navy
				Includes the United States Marine Corps.
			DX	United States Marine Corps
			DY	Department of Air Force
			DZ	Department of Army
			FG	Federal Government
				DoD Special Instructions:
				1. Use this code to indicate a Federal agency other than DoD or the military service that originated the line of accounting.
				2. When code "FG" is cited, use FA201 code "ZZ"
				and transmit the federal agency line of accounting (LOA) as one string in FA202. Multiple iterations of
				the 1/FA1/290 segment may be required to transmit
				the complete LOA if it is longer than 80 characters.

Segment: TDS Total Monetary Value Summary

Position: 010

Loop:

Level: Summary Usage: Mandatory

Max Use:

Purpose:

To specify the total invoice discounts and amounts

Syntax Notes: Semantic Notes:

- 1 TDS01 is the total amount of invoice (including charges, less allowances) before terms discount (if discount is applicable).
- 2 TDS02 indicates the amount upon which the terms discount amount is calculated.
- 3 TDS03 is the amount of invoice due if paid by terms discount due date (total invoice or installment amount less cash discount).
- 4 TDS04 indicates the total amount of terms discount.

Comments:

TDS02 is required if the dollar value subject to discount is not equal to the dollar value of TDS01.

Notes:

- 1. The data elements in this segment are N2 type. This means that any number transmitted will carry two implied decimal places. Thus, if the number transmitted is 100, it will be read as \$1.00 by the receiving application.
- 2. The maximum number of numeric characters available now in data element 610 (amount) has been increased from 10 to 15 in the ASC X12 standards.
