# Reduce Legacy Systems (RLS)
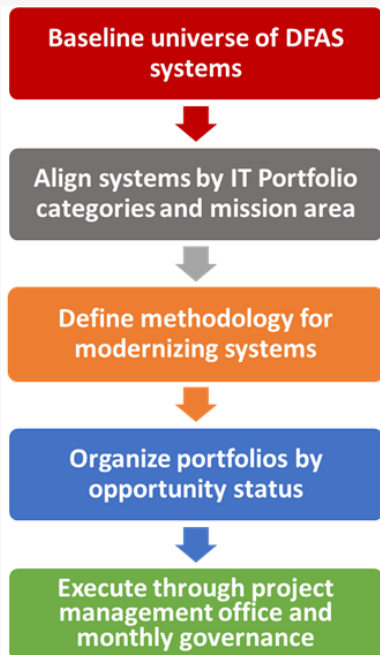

**Mission:** Reduce legacy systems from the DFAS system inventory to optimize the operating environment and achieve cost savings.

## A Proven 8-Phase Methodology

Discovery & Initiative Concept → Business Case Analysis → Requirements → Certification / Funding → Scheduling → Design / Development → Target Implementation → Legacy Retirement

· Spans Discovery through Retirement
· Includes Collaboration with Stakeholders to Determine Target Systems
· Documented via Business Case Analyses (BCAs), which support funding requests

## RLS Modernization Strategy

Baseline universe of DFAS systems
↓
Align systems by IT Portfolio categories and mission area
↓
Define methodology for modernizing systems
↓
Organize portfolios by opportunity status
↓
Execute through project management office and monthly governance

## Customer Benefits

Simplify and standardize the DoD Financial Management business environment

Increase efficiency and effectiveness

Eliminate duplicate capabilities

Maximize Enterprise Resource Planning (ERP) capabilities

Improve audit steadiness

Enable strong internal controls

Reduce interfaces and data translations

Reduce total DoD FM systems cost
