21-6233
Tier II DoNet Support
21-6233, Length 2 years; DUTIES: Two (2) year unaccompanied overseas tour with the option to extend for the third year. Open to Army and Air Force service members MD5 25B or AFSC 3D. Provide DISAs Service Support Environment (SSE)/Global Service Desk (GSD) with mission critical technical support within a joint classified support area at DISA HQ, Ft. Meade. Personnel in this position provide immediate Tier II technical support and must have a high aptitude for resolving workstation level technical issues. This is a front-line position requiring professionalism, expert technical skills, and persistent communications with customers and Global Service Desk leadership. A few key duties: installation, modification, and repair of end-devices (laptops, desktops, printers) to restore service and resolve technical issues with Local Area Networks, Wide Area Networks, and other systems. Provide technical assistance and support for incoming queries and issues related to computer systems, software, and hardware. In addition to on-site service restoration support, candidates will actively ensure the security posture of the end-user devices, and as needed provide remediation. Document procedures and coordinate with Tier I (Regional Support Centers) to improve the agency's ability to achieve First Contact Resolution.
QUALIFICATIONS: Must have an active Security + certification and experience working desktop/mobility/service desk environment or Windows Server admin. Requires excellent written and verbal communications. Other IT certifications (HDI Desktop, +, Network+, etc.) are desired, but not required. Active Top Secret / SCI eligible

21-6234

22-6020
Integrated Logistics Support Manager with Software Support
22-6020, Length 1 Year with opportunity to extend. 1. Knowledge of Integrated Logistics/Product Support (ILS/IPS) concepts, principles, policies, and acquisition/contract regulations and their application to a variety of unique and complex systems. 2. Understands ILS/IPS elements as they relate to systems acquisition and life cycle management across related disciplines such as systems engineering and designing, reliability, availability, maintainability, production, test & evaluation, cyber-security, quality assurance, operational deployment, demilitarization, and disposal. 3. Knowledge of software support requirements and processes, as well as IT products and support. Understand Configuration Management for software. 4. Ability to determine logistics impacts to Engineering Change Proposals (ECPs) and provide detailed analysis (provisioning, tech pubs, and training.) 5. Follow through on ECP incorporation and verification that provisioning, tech pubs, and training reflect the new configuration. 6. Ability to work across branches, divisions, and departments in the planning and execution of acquisition and support logistics functions. 7. Work with the Life Cycle Logistics Competency Lead (LCL) in institutionalizing the logistics discipline and the professional growth of members of the logistics community. 8. Desired skills include: Knowledge of software intensive systems acquisition IAW the latest DoD Policy, knowledge of fieldings, test and training events support, knowledge of IT procurement, DoD IUID Registry knowledge, and an understanding of Agile software development. 9. Ensure compliance with current NAVSEA and Naval Surface Warfare Center (NSWC) policies, initiatives and regulations. 10. The incumbent must have demonstrated the ability to meet diverse groups and secure their cooperation, confidence and interest. 11. Ability to maintain accurate records on status of all command logistics documentation for a variety of complex systems.

22-6051
Division Quality Focal Point
22-6051, Length 1 year: The Strategic Systems Engineering Division is seeking a highly qualified Quality Focal Point. The QFP functions as the IC Lead to establish processes, workflows and PI plans, facilitate events, capture, collect, and present data, action items and manage the storage on Division SharePoint/shared drive sites. Track action items to completion, aid in facilitating follow-up meetings, participate in branch/division monthly walk-throughs with managers on Flag boards, and maintain/report metrics. Monitor NSWC Crane Action Management System (CAMS) tickets and provide comments or recommendations for closure of those CAMS tickets. Provide requested documentation and support each branch on the annual Self-Assessment audit to ensure closure of any action items through CAMS. Route documents for approval signature electronically in IPDM as required / directed by NSWC Instructions. Qualifications: College Degree pref. but not required. Experience with ISO / Lean Six Sigma programs beneficial.

22-6052
Site Security Manager
22-6052, Length 183 Days: The Strategic Systems Engineering Division of NSWC Crane is seeking a highly qualified Site Security Manager (SSM) to support the construction of a Strategic Systems Engineering Facility (SSEF). Provide project management duties that include administration, managerial oversight, and technical implementation of the Construction Security Plan (CSP) for the design and construction of the aforementioned facility. Participate in meetings, in-progress reviews, and integrated concept and product teams, working groups and provide briefings in the capacity of SSM. Provide input to staff meeting slides related to site security and applicable construction process and the application of the functional and performance requirements as identified in Intelligence Community Standard (ICS) 705 under section L, IIDS and ACS Documentation Requirements. Qualifications: College Degree pref. but not required. Experience commercial construction or DOD/COR requirements.

22-6139
Engineer NCO
22-6139, Length 420 Days: Assists the Engineer and Deputy Engineers in daily activities to include oversight of projects. The Engineer NCO will ensure safety regulations, as well as all Standard Operating Procedures are followed. Reviews, provides comments and approves contractor’s safety plan and ensures it is in compliance with the most current version of EM 385-1-1. Advises the Project Manager when the plan is acceptable and work can start on site. The position is responsible for performing and coordinating conventional and unconventional inspections at different construction sites throughout the Kingdom of Saudi Arabia. Manages and monitors equipment, staffing, workmanship, safety practices, and analyzes a variety of unusual conditions, problems, or questions.

22-6140
Deputy Engineer
22-6140, Length 420 Days: Works under the general direction of the G4 Division Chief and directly under the Senior EC section lead engineer, through whom all work orders are made and delegated authority received. Assignments are made in the form of contract documents including plans and specifications covering work to be accomplished by the contractor. Incumbent is expected to ensure that contract scope, contract drawings, shop drawings, specifications, codes, quality management and safety are followed throughout the life of the contract. Follows the day to day work to ensure the contractor is meeting his work schedule as approved. Incumbent is required to assume full responsibility for ensuring that all non-conforming work is properly identified through test reports or observations and that the contractor’s Quality Assurance (QA) team is notified for corrective action. As a subject matter expert, works out problems largely on his own initiative. Incumbent acts independently to perform quality assurance and safety assurance functions, and keeps supervisor appraised on any controversial issues and/or policies of an unusual nature.

22-6151
Nondestructive Test Technician
22-6151, Length: 180 Days: The 39th Space Operations Center and the Space and Missile Systems Organization at Los Angeles AFB, AZ. Provides a unique opportunity for exposure to a wide variety of Department of Defense aviation assets and other systems. Duties include performing nondestructive testing techniques on those assets and their respective aerospace equipment. Required tasks will include Eddy Current, Magnetic Particle, Liquid Penetrant, Ultrasonic, E-Ray, and ACP/MCD analysis. Qualifications: Must be A2772 qualified.

23-6239
Program Analyst (Project Scheduler)
23-6239, Length 730 days: Mission Description: As a project scheduler you will build, analyze and monitor a wide variety of project schedules throughout the Pittsburgh District. You will be tasked with ensuring that all projects are identified and correctly entered into our integrated project management information system, and that all Project Managers (PMs) use the correct enterprise project architecture/WBS templates to define products, sub products, activities, or tasks for their projects. You will be tasked with establishing and following policies and procedures for PMs and other PDT members to build and maintain project schedules. You will be tasked with making changes directed by the PM to project schedules, running routine reports and performing financial processes to ensure the project has sufficient funding. You will be asked to report on, build and update project schedules. You will be expected to coordinate schedule updates and inform the team of upcoming milestones. Applicants must possess a PMP and/or college degree, desired certifications include: Scrummaster, ITIL, PE, CAPM, PMI/CFM. Lean Six Sigma Green/Black Belt and CCM. Applicants must interview and be selected by the Deputy District Commander. Qualifications: USACE experience a plus.

23-6243
DoD INVESTMENT ADVISORY COMMITTEE (IAC)
23-6243, length 21 days: Selectee will serve as a member of Investment Advisory Committee (IAC) for the Department of Defense (DoD) Investment Board. The members formally meet semi-annually and participate in quarterly (or as necessary) teleconferences with auditors, DFAS, and others. Orders for in-person meetings will be Active Duty for Operational Support (ADOS) funded by DFAS. Candidates must possess an understanding of and demonstrate experience managing and/or advising on large trust fund, pension funds, or similar fund investments. Experience working in the institutional markets, specifically in a fixed income capacity, is preferred. The purpose of this position is to provide financial and strategic analysis to the DoD Investment Board. The DoD Investment Board is comprised of the Director, Defense Finance and Accounting Service (Chair); Deputy Chief Financial Officer, Office of the Under Secretary of Defense (Comptroller); and a senior military service member appointed by the Under Secretary of Defense (Comptroller). The DoD Investment Board establishes the investment policies, objectives and strategies for the Military Retirement Fund and the Medicare Eligible Retiree Health Care Fund, among other trust funds. These funds represent approximately $1.6 trillion in assets. The funds are restricted to investments in U.S. Treasury securities. The primary objective for the IAC is to provide financial and strategic analysis to DFAS and the DoD Investment Board concerning the trust funds identified above. The financial analysis will include: Review and evaluate the current and proposed investment strategies and the ability of the strategies to meet the fund's objectives and requirements, establish and maintain a program to identify and evaluate potential risks and opportunities, and provide options for future investments for the trust funds, analyze risks associated with investment options, analyze risks associated with current funding levels, trust fund liabilities, produce and present analysis in the form of a written report to the Investment Board, establish and provide methods, procedures, and documentation for the development of all analyses and ultimate recommendations, brief the DoD Investment Board, and be prepared to answer any questions. Qualifications: We are looking for: Chartered Financial Analyst (CFA), Fixed income experience, portfolio manager, finance, investment manager, or Actuary.

23-6247
Cloud DevOps Engineer **WILL TRAIN / TELEWORK AUTHORIZED**
23-6247, Length 1 Year: The Cloud DevOps Engineer will play a critical role in managing the continuous integration, delivery, and deployment of applications and infrastructure on Amazon Web Services (AWS). Responsibilities will include managing the DevOps pipeline tools, such as JIRA, Confluence, GitLab, and Artifactory, to ensure smooth and efficient delivery of code to the cloud. Incumbents will work closely with development and infrastructure teams to create an infrastructure as code environment using cloud formation templates and other similar technologies. To excel in this role, incumbents must have a deep understanding of the AWS environment and be able to automate processes to reduce deployment time and increase efficiency. Incumbents must possess strong problem-solving and possess excellent communication skills to collaborate with cross-functional teams. Qualifications: Civilian experience will be considered for position eligibility. DoD OIPR/SL40 Training Certifications required. At least IA level II (CCNA-Security, CySA**+, GICSP, GSEC, Security+ CE, CND, SSCP, CASP+ CE, CCNP Security, CISSP (or Associate), GCED, GCC, CSSP) has context menu.

Business Analyst will be expected to have experience in business analysis, requirements gathering, and project management. Business Analyst will be expected to have experience in business analysis, requirements gathering, and project management. Business Analyst will be expected to have experience in business analysis, requirements gathering, and project management.

23-6314 Budget Analyst
23-6314, Length 365 days: - Budget Analyst will perform analytical, technical and administrative support related to MPE budgetary processes. The Budget Analyst will manage and update the cost model using data provided by stakeholders and the MPE team. Incumbent will prepare reports and analyze data as needed in support of monitoring and tracking cost burn down rates. The Budget Analyst will work with the Finance team to track and prepare monthly billing for new MPE contracts. They will review processes and propose alternatives and guidance. They will work with MPE and customers throughout the year to determine whether changes to funding levels are needed. The Budget Analyst will be expected to have experience in budget and financial analysis, requirements gathering, excel and pivot tables, documentation, and stakeholder engagement.

23-6315 Cloud Machine Learning Engineer
23-6315, Length 1 year: - A Cloud Machine Learning Engineer designs and deploys machine learning models on AWS. Incumbent's role involves understanding customer needs, utilizing machine learning algorithms and frameworks, selecting appropriate AWS services, and ensuring the scalability, reliability, and security of machine learning solutions. Staying updated with the latest advancements in machine learning is important in this role.

23-6316 Security Engineer
23-6316, Length 1 year: - A Security Engineer is responsible for implementing and maintaining security measures to protect an organization's data, applications, and infrastructure in the cloud. The incumbent must possess a strong understanding of security principles and work with various AWS security services to ensure the security of the AWS environment. Duties include designing and implementing security measures, conducting security assessments, developing security policies, and monitoring and responding to security incidents. Qualifications: Candidate will be expected to consider the position of application eligibility. DoD 8570/8140 Certifications required: At least IAT level II (CCNA-Security, CySA™, GICSP, GSEC, Security+ CE, CNSS, SSCP, CAP® CE, CCNP Security, CISSP, CISSP (or Associate), GSCID, GG, CCSP) has context menu.

23-6317 Cloud Security Engineer
23-6317, Length 1 year: - A Cloud Security Engineer is responsible for implementing and maintaining security measures to protect an organization's data, applications, and infrastructure in the cloud. The incumbent must possess a strong understanding of security principles and work with various AWS security services to ensure the security of the AWS environment. Duties include designing and implementing security measures, conducting security assessments, developing security policies, and monitoring and responding to security incidents. Qualifications: Candidate will be expected to consider the position of application eligibility. DoD 8570/8140 Certifications required: At least IAT level II (CCNA-Security, CySA™, GICSP, GSEC, Security+ CE, CNSS, SSCP, CAP® CE, CCNP Security, CISSP, CISSP (or Associate), GSCID, GG, CCSP) has context menu.
Cyber Security Auditor

23-6318, Length 1 Year: A Cyber Security Auditor conducts audits and assessments to review privileged accounts, network configurations, compliance documentation, change management processes, and cyber workforce compliance. Incumbent's responsibilities include analyzing security controls, identifying vulnerabilities, providing recommendations for improvement, and ensuring compliance with cybersecurity standards. Cyber Security Auditors also monitor the quality of security controls on a periodic basis.

Cyber Security Watch Officer

23-6319, Length 1 Year: A Cyber Security Watch Officer protects the National Background Information Services (NBIS) environment from cybersecurity threats. Acting on behalf of the System Owner, the Defense Counterintelligence and Security Agency (DCSA) Cloud Enterprise ISM, and the DCSA Cloud Enterprise Security Operations Center (SOC) lead, you will assist with incident response, track SOC investigations, elucidate for investigation, review and approve detection and alerting changes, and develop and improve SOPS, TTPs, guidelines, and policies. Incumbents also oversee SOC operations, ensuring effective cybersecurity monitoring and response. Qualifications: *Civilian experience will be considered for position eligibility. DOD 8570/8140 Certifications required: At least IAM level II+ (CAP, CASP+ CE, CISM, CISP or Associate), GSLC, CGSC, HCISPP.

Project Manager

23-6320, Length 1 Year: Project Manager will help the project teams manage projects and track deliverables. They will support planning meetings, administrative and project activities. The Project Manager will manage and report on risks and update stakeholders and the MPE team on status. They will prepare reports and analyze data. The Project Manager will track and update schedules for new MPE customers. They will review processes and propose alternatives and project strategies. They will work with MPE and customers to create and provide metrics and slide presentations. They will oversee project coordinators responsible for scope, cost, and control of multiple projects. The Project Manager will be expected to create spreadsheets and understand schedule and tracking processes. Qualifications: (Required) - a nationally or federally/DoD recognized certification in project management (e.x. Project Management Institute (PMI) Project Management Professional (PMP), PMI Agile Certified Practitioner (ACP), graduate certificate in project management, DAU courses in Project Management)

Vulnerability Scanner

23-6321, Length 1 Year: The role of a Vulnerability Scanner is to use and maintain cybersecurity tools like ACAS (Tenable Nexus), HBSS, BUJRP, and CheckMark to scan and report on cybersecurity. Incumbent review results to ensure scans are successfully conducted and make recommendations, and create methods to visualize results for effective remediation of vulnerabilities. Qualifications: *Civilian experience will be considered for position eligibility. DOD 8570/8140 Certifications required: At least IAT level II+ (ECNA-Security, CySA+ **, SCISC, GSEC, Security+ CE, CND, SCSP, CAP+ CE, CCNP Security, CISA, CISSP or Associate), GLCD, GCCH, CCSP)

Nellis MILCON Install Support

23-6323, Length 61 days: Positions will support the installation of telecommunication hardware and infrastructure at assigned locations (Nellis AFB).

IT Security Operations

23-6325, Length 2 Years: The individual will perform roles/responsibilities as defined IAW AFIT-21-101 and AFIT-17-120. Mastery of and skill in applying IT operations related to security of systems, e.g., access control, security audit and accountability, security controls for configuration management, incident response, media protection, personnel security, information security, system and communications protection, and system and information integrity. Individual will also perform roles as ISSO, Security Manager, and Top Secret Control Officer. Qualifications: TS/SCI Required. Security+ Certification Risk Management Framework experience. Information Systems Security Officer Manager (ISSO/ISSM) experience will be helpful.

Military Police Officer

23-6326, Length 2 Years: Military Police - Tobyhanna Army Depot, in Northeastern Pennsylvania, seeks military police. Duties include: Will be assigned law enforcement/Security duties to uphold Federal Laws and Regulations, maintain good order and discipline, and support the installation commander’s law enforcement and security requirements. Typical duties include foot and motorized patrol and control of pedestrian and vehicular traffic and conducting random anti-terrorism measures (RAMM) in accordance with local regulations and procedures. Qualifications: 31N or local

Environmental Science/Bioenvironmental Engineer/Engineering Technician

23-6329, Length 2 Years: Environmental support specialist for the S ОО Office Consultant. Support environmental compliance, implementation, inspection, auditing, monitoring, and reporting responsibilities, including regulatory compliance to Federal, State, and local requirements. Support project safety program specific to environmental compliance and Hazard and Toxic Waste concerns. Participates in the review of plans and specifications for environmental aspects of contracts and provides recommendations. Develops environmental implementation processes, policy and guidance. Develops corrective action plans for non-compliance issues. Qualifications: Environmental Engineer Office - USAE experience a plus. Preferred MOS include 72D.

Engineering Technician - Survey

23-6330, Length 2 Years: Performs or reviews all required calculations, reductions, analyses, and processing of hydrographic survey data to complete a variety of cartographic products using CADD, HyPack, or other 3D data processing software suites. Typical tasks are listed here: dredging volume calculations; disposal area volume capacity calculations; seabed contour maps; before and after dredge completion surveys; statistical shale rate analyses; 2-D and 3-D subsurface model diagrams; and manipulations of digital engineering data, maps, and remote sensing imagery within a Geographic Information System (GIS). Plans and coordinates the activities of the survey field crews engaged in processing the survey data, and support historical data, in support of design, construction, and operation and maintenance functions in support of navigation locks and dams, disposal facilities, and facility construction. Responsibilities for planning, direct, coordinating, and supervising, and reviewing activities of the field survey crews and survey equipment in accomplishing surveying operations which include reconnaissance, preliminary, construction, control and topographic surveys for civil projects in the project office jurisdiction. Works in the field to accomplish tasks when needed. All surveys are completed in an electronic environment using total stations, survey 

Deputy Disbursing Officer

23-6334, Length 1 Year: The position is responsible for processing daily funding requests and reconciliation of pay agents in the classified class of DSNSs SS70, 6174 and 8803. The primary purpose of this position is to provide administrative support fund in the Deployable Disbursing System (DDS) and Centralized Disbursing System (CDS) to agents and disbursing activities for numerous 5A sites. Additionally, the position assists in researching and clearing Statement of Differences (SOD’s) and gathering Line of Accountings (LOA’s) for multiple audit. Qualifications: Candidate must have TS/SCI clearance. Finance background and MOS/AFSC.

Biog 530 ISP Install Support

23-6335, Length 55 days: 530 ISP install support. Positions will support the installation of telecommunication hardware and infrastructure at assigned locations.

Intelligence Analyst

23-6337, Length 1 Year: Incumbent will produce weekly unclassified, secret, and top secret intelligence summaries to 4.4k software and acquisition personnel throughout the department of defense, assist security personnel in improving local area security culture through unclassified cyber security/intelligence briefings, and conduct routine current intelligence briefings to technical and non-technical staff. Incumbent will also assist in defensive cyber operations by providing indicators of compromise to network defense analysts and conducting research on indicators of malecy identified on local, non-APRN, software development networks. These efforts also include assisting full time staff in leading attack path analysis and table top exercises to identify potential network vulnerabilities and augmenting penetration tests with intelligence information. The incumbent will also assist in the development of the emerging USAF Software Directorate’s first software supply chain risk management strategy responsible for peer reviewing locally developed strategy aimed at overarching how the Air Force ingests commercial and open source software worldwide. Other duties, as assigned by the local area supervisor or the AFSC SIO are also likely. These may include, but are not limited to: local area threat briefings for major events (e.g., Air Show), support for general office/SIET tasks, assisting in manpower, facilities, or system development and requirements development. Qualifications: Active TS/SCI Required Strong background in one of the following fields: information technology support (Tier II), software development, software assurance, systems engineering, offensive or defensive cyber operations, or supply chain risk management Current certifications are not required, but evidence of current or past certification is beneficial

23-6338 Deployment Operations Force Provider
23-6338, Length 1 Year: Executes contingency planning support requirements to ensure DLA support for agencies customers worldwide. Responsible for all operations as they relate to DLA Deployment Support Teams (DSTs) and Immediate Response Force Rapid Deployment Teams (RF RDTs) civilian and military (active and reserve components) supporting CCMDs deployments as members of DSTs and (RF RDTs), Support Customer Liaison Operations, Supply Management Council (SMC), Customer Assistance Specialist (CAS), and Emergency Essential (E-E) initiatives. Expert knowledge of DoD Travel system and process travel authorizations and vouchers as necessary to execute various methods of DoD Travel. Firm knowledge in the execution Approving Official duties for Defense Travel System, in conjunction with traveler responsibilities. Required to analyze travel Authorizations and Vouchers to ensure travel compliance in accordance with DoD and Agency travel policies to prevent a unauthorized transactions and fraud waste and abuse. Prepares Travel information for all travelers (military and civilian) and gives briefings as required. Qualifications: Firm knowledge of Defense Travel System (DTS), DTS roles and responsibilities. Excellent writing and briefing skills.

23-6339 Project Engineer
23-6339, Length 730 Days: Valley Resident Office. The position this request would be filling is critical to the mission success of SPK. Without successful resourceing operational degradation may result, critically impacting the mission. Responsible for performing and directing the full range of field engineering activities associated with construction operations. Plans, schedules, monitors, and controls the full range of construction operations. Compiles data and prepares a variety of correspondence and reports relating to assigned project including status of construction, letters to contractors concerning safety matters, or to resolve difference of opinion over plans and specifications. Replicates correspondence and reports relating to assigned project including status of construction, letters to contractors concerning safety matters, or to resolve difference of opinion over plans and specifications. Provides resolution of technical data on cost, methods, and materials. Takes all actions under an appointed COR. Qualifications: Army Engineer Officer - USACE experience a plus.

23-6340 Project Engineer
23-6340, Length 730 Days: Folsom Resident Office. The position this request would be filling is critical to the mission success of SPK. Without successful resourceing operational degradation may result, critically impacting the mission. Responsible for performing and directing the full range of field engineering activities associated with construction operations. Plans, schedules, monitors, and controls the full range of construction operations. Compiles data and prepares a variety of correspondence and reports relating to assigned project including status of construction, letters to contractors concerning safety matters, or to resolve difference of opinion over plans and specifications. Replicates correspondence and reports relating to assigned project including status of construction, letters to contractors concerning safety matters, or to resolve difference of opinion over plans and specifications. Takes all actions under an appointed COR. Qualifications: Army Engineer Officer - USACE experience a plus.

23-6341 Project Engineer
23-6341, Length 730 Days: Natomas Resident Office. The position this request would be filling is critical to the mission success of SPK. Without successful resourceing operational degradation may result, critically impacting the mission. Responsible for performing and directing the full range of field engineering activities associated with construction operations. Plans, schedules, monitors, and controls the full range of construction operations. Compiles data and prepares a variety of correspondence and reports relating to assigned project including status of construction, letters to contractors concerning safety matters, or to resolve difference of opinion over plans and specifications. Takes all actions under an appointed COR. Qualifications: Army Engineer Officer - USACE experience a plus.

23-6342 Create Decision Advantage Manager
23-6342, Length 1 Year: Position will immensely contribute to actions required as stated in Command's Campaign Plan IOT 4, Create Decision Advantage, which is also a command priority that shapes the command's ability to have and apply data at a time of our choosing to generate information required for situational awareness and accentuating decision making. Position requires a field grade officer that is strategic minded, a critical thinker, and skilled to deliver solutions regarding 5 intermediate military objectives that involves J-D1s and TCCs with collaboration/coordination from external organizations such as J-6A and Joint Staff. Must be a skilled planner able to meet actions and deliver products IAW established timelines and action items - Ability to understand mission requirements, apply analytical thinking, and then translate into battle rhythm events and information flow - Represents the command at numerous working groups such as Joint AF Domain Command and Control working groups and related-functional capabilities boards - Working knowledge of Microsoft Office Suite including developing briefings, point papers, and executive summaries - Possesses excellent communication skills since there are numerous briefings to AOs, councils, General Officer Steering Committee, and to the commander level Qualifications: Required Clearance: Secret Skill: 1D751, IT1/2, 25B, 0631

23-6344 OPLAN Integration Planner
23-6344, Length 1 Year: Integrate operational plans into Mobility Requirements and forecasting products. Plan AFR, Seafall and Aerial Refueling as required to integrate J5/4 and J3. Provide operational inputs into data analytics for operationalizing OPLANS. Backstop one deep J3B positions as required to continue moving forward with J5/4 and J3 integration. Qualifications: Required Clearance: TS Skill: Mobility/Planner/TRANS

23-6345 Cyber Operations Center Watch Officer
23-6345, Length 13 Days: CyOC requirement for watch officer in support of plus-up requirements directly supporting USTRANSCOM exercise support; in addition, position will support three days of 24x7 watch officer coverage during CyOC training day to ensure annual certification requirements are met. Responsibilities: Maintain accurate and timely information assurance (IA), situational awareness (SA), and respond to network and cyber events and incidents on a 24x7 basis. Provide SA to senior UTRANSCOM leadership via reports, briefings and verbally. Respond to phone and email inquires regarding a variety of network, system, and cyber events to include scheduled/unscheduled outages and software/hardware upgrades. Perform tasks utilizing automated trouble management system and other monitoring tools. Monitor and respond to network and system event management tools using existing processes and checkboxes is deployed at a Level One Service Desk supporting large customer base. Qualifications: Required Clearance : Secret : DD1751, IT1/2, 25B, 0631

23-6346 Senior Mobility Analyst
23-6346, Length 1 Year: Provide analytic support to OSD, joint Staff, CCMDs, Services, TRANSCOM and TCC involving Modeling & Simulation, data analysis, and staff coordination on mobility problems supporting the National Defense Strategy and supporting strategies. Analysis focus includes Program Budget Review (PPR), Deliberate Planning, force flow planning conferences, and associated mobility studies including the Contested Environment. Mobility analysis includes airlift, sealift, and ground movement of unit equipment, personnel, sustainment, noncombatants, patients, ammunition, and bulk fuel. Contested Environment focuses on adversary capabilities from IC sources. Qualifications: Required Clearance : TS/SCI Skill : 15A, 49A, OR 1835

23-6347 Security Specialist
23-6347, Length 1 Year: To keep up with the increasing demands of bringing the fight to JWICS, Command Planners, Cyber professionals, and Logisticians are being required to upgrade their SCI eligibility. Additionally, there is a lifecycle tracking requirement to ensure these new authorizations and existing personnel maintain their SCI status through required reporting and de-certification of derogatory information reduce the potential for insider threat. With the global presence of USTRANSCOM, the construction, modification, and accreditation of SCIFs within Command leadership suites and increased SCIF footprints for our J5/4, J3, and J6 directrories to collaborate in secure spaces. Meeting regulatory guidance is paramount to ensure classified information is properly protected. The individual will be trained on key tasks required to support SSO administrative functions and also support the Chief, J5O, and the Physic and Purchasing teams. Member will work hand-in-hand with the SSO team utilizing on-line training, regulatory resources and OIT. Due to the increase with real world operations and increased sharing of classified, the potential for the loss or compromise of classified information will increase exponentially as seen with the current security issues being tracked by the Defense Intelligence Agency and Inspector General. The increased requirements without the increase in support will adversely affect their ability to ensure security clearances are maintained, facility accreditations remain valid, and classified information is appropriately protected. Qualifications: Required Clearance : TS/SCI Skill : 42L/YN/SID/1N
