Chart Legend:

A - Added

These are new requirements due to revised and updated source documents.

C - Changed

These requirements were contained in previous releases, but were changed for various reasons.

D - Deleted

These requirements were removed and are no longer required by the source documents.

Note: If there is no code in the requirements value added or change type columns, it is by definition unchanged.

Financial Management Systems Requirements Manual Volume 01, General Ledger

August 2014

Strategy, Policy and Requirements

SUBJECT: Financial Management Systems Requirements
Volume 01, General Ledger

1. PURPOSE

a. This Volume presents the financial management system design and implementation requirements for Department of Defense (DoD) military components' and agencies' General Ledger financial management systems. This Volume is part of the publication which reissues Defense Finance and Accounting Service (DFAS) 7900.4-M, (The Blue Book), "Financial Management Systems Requirements Manual." This manual is a compilation of the General Ledger specific Federal and Department of Defense (DoD) systems requirements. Any system reviews need to consider all DFAS 7900.4-M volumes and requirements in addition to these General Ledger specific items contained in this volume.

b. The Blue Book serves as a "roadmap" to Federal and DoD financial management system requirements by major financial management functional areas and their authoritative sources, and will assist managers who are responsible for financial management systems in planning, designing, enhancing, modifying, and implementing financial management systems. Managers are ultimately responsible for being knowledgeable of and complying with the various authoritative sources of financial requirements (both legislative and regulatory). Guidance and procedures are contained in several volumes located on the DFAS Reference Library at <http://www.dfas.mil/dfasffmia/bluebook.html>. Appendix 4 of the manual includes links to where authoritative sources of requirements may be accessed.

c. Adherence to these requirements and all other applicable DFAS 7900.4-M requirements will enable DoD military components and agencies to meet Federal mandates and will help facilitate DFAS to progress toward reaching its strategic goal of providing services faster, better, and cheaper. The objective of this Volume is to promulgate the General Ledger specific financial management systems requirements for system and program managers' use in developing General Ledger functionality.

2. APPLICABILITY:

Requirements contained within this document are applicable to accounting and finance systems operated and maintained by DoD.

3. POLICY:

a. This Volume provides a synopsis of Federal and DoD financial systems requirements, mandated by policy, for General Ledger (GL) financial management systems. It is a compilation of General Ledger specific financial management systems requirements mandated by Public Law 104-208, "Federal Financial Management Improvement Act of 1996," September 30, 1996. ;

b. This Volume incorporates revisions to the requirements from the authoritative sources. It also incorporates updates to existing requirements **via highlighting the appropriate text in bolded blue font**. See description of requirement changes for a complete listing and description of the financial systems requirements changes, deletions, and additions, for this volume.

c. Users of this Volume may forward questions, comments and suggested changes to:

4. ORGANIZATIONAL RESPONSIBILITIES FOR FFMIA COMPLIANCE

a. Within DoD, various organizations operate financial management systems. In an overall scheme, many of these systems should be linked in an integrated network. However, these systems frequently “stand-alone” or “stovepipe” systems that are not logically integrated with other related systems. Critical financial data, instead of being transferred electronically between systems through well-controlled interfaces, are often transferred manually by means of journal vouchers, hardcopy spreadsheets, “data calls,” or other inefficient and error-prone methods.

b. DFAS functions as the primary Departmental entity responsible for producing a Trial Balance from the ERP general ledger and preparing the financial reports for the DoD. Much of the data used by DFAS to carry out the DoD’s accounting and financial reporting functions—such as property and inventory values—originate in non-DFAS organizations or systems. Therefore, other organizations, primarily the military services and Defense agencies, should be held responsible for the compliance of their financial management systems with all applicable Federal requirements. Appendix 5 of DFAS 7900.4-M contains Federal and DoD guidance on FFMIA compliance, evaluation, and reporting.

5. PROCEDURES:

Procedures are presented in each Volume of this Manual as appropriate.

6. RELEASABILITY:

UNLIMITED. This Volume as part of DFAS 7900.4-M is approved for public release and may be accessed at <http://www.dfas.mil/dfasffmia.html>

7. EFFECTIVE DATE: This Volume is effective immediately.

GENERAL LEDGER INTRODUCTION

1. The general ledger, as the central function of a core financial system, is the highest level of summarization within the system. The general ledger provides financial accountability for budgetary resources, stewardship over assets, reporting of cash/fund resources, and visibility of total costs. The general ledger maintains account balances by fund structure and individual general ledger accounts. All transactions to record financial events shall be posted, either individually or in summary, to a general ledger regardless of the origin of the transaction.
2. Subsidiary ledgers at various levels of detail support the general ledger. Such subsidiary ledgers may be maintained in the core financial system or in other systems. For example, detailed property records supporting the equipment account in the general ledger may be maintained in a system devoted to controlling and maintaining equipment.
3. The United States Standard General Ledger (USSGL), under Volume I of the Treasury Financial Manual (TFM) Supplement Number 2 (August 2009), provides a uniform Chart of Accounts to be used in standardizing federal agency accounting which supports the preparation of standard external reports required by central agencies. The Office of Management and Budget (OMB) Circular A-123, Appendix D and the Federal Financial Management Improvement Act (FFMIA) of 1996 require implementation of the USSGL at the transaction level throughout an agency's financial management systems. The USSGL is composed of five major sections: (1) Chart of Accounts, (2) Account Definitions, (3) Accounting Transactions, (4) USSGL Attributes, and (5) Report Crosswalks. Those federal executive agencies that serve on the USSGL Board maintain the Chart of Accounts and Account Definitions. The Financial Management Service (FMS) publishes the five sections of the USSGL in the TFM and posts them on the Internet at <http://www.fms.treas.gov/ussgl>.
4. The general ledger, as the ultimate overall control for capturing the effects of all financial events, ensures that debits equal credits for every recorded transaction in a single journal entry. The general ledger maintains accounts for assets, liabilities, net position, revenues and other financing sources, expenses, gains, losses, budgetary data, and "memorandum" information.
5. The general ledger defines the chart of accounts and transaction posting rules. It is used to update multiple accounts, including budgetary and proprietary accounts, for a single transaction or financial event. It provides for entering journal entries to post transactions, record account adjustments, and perform periodic closings. The general ledger provides a standard accounting structure for the accumulation and processing of financial management data, enhances control of maintaining financial databases, and supports budgetary and external financial reporting. This volume and other DFAS 7900.4-M volumes may be applicable to your system.

¹A financial event is any event initiated or caused by either the agency or forces outside the agency that has financial consequences to the agency or Federal government. Generally, the consequences of financial events are recorded on the agency's financial records. Payments of debts, collection of receivables, receipt of appropriations, incurrence of potential liabilities, signing of contracts, ordering goods or services

Perform Periodic General Ledger Postings	01.05.042		To support the Financial Reporting process, the system must provide automated functionality to generate a trial balance report. Parameter is the accounting period. Result is a report displaying the following balances for each USSGL account or USSGL account and attribute combination: • Beginning balance for the accounting period • Total amount of debits for the accounting period • Total amount of credits for the accounting period • Cumulative ending balance for the accounting period. Provide the option to specify whether general ledger account balances are rolled up to the TAFS level, internal fund level, or organization level. The report must include all general ledger accounts. Accounts must be displayed at the USSGL and attribute level (i.e., separate amounts should be displayed when there is more than one attribute value within a USSGL account. Subtotals for beginning balance, accounting period activity, and ending balance columns must be provided after each change in TAFS, internal fund, and organization on the report.
