## Financial Management Systems Requirements Manual Volume 06, Managerial Cost Accounting

August 2014

---

Strategy, Policy and Requirements

**SUBJECT: Financial Management Systems Requirements  
Volume 06, Managerial Cost Accounting**

### 1. PURPOSE

a. This Volume presents the financial management system design and implementation requirements for Department of Defense (DoD) military components' and agencies' Managerial Cost Accounting financial management systems. This Volume is part of the publication which reissues Defense Finance and Accounting Service (DFAS) 7900.4-M, (The Blue Book) "Financial Management Systems Requirements Manual". This manual is a compilation of the Managerial Cost Accounting (MCA) specific Federal and Department of Defense (DoD) systems requirements. Any system reviews need to consider all DFAS 7900.4-M volumes and requirements in addition to these Managerial Cost Accounting specific items contained in this volume.

b. The Blue Book serves as a "roadmap" to Federal and DoD financial management system requirements by major financial management functional areas and their authoritative sources, and will assist managers who are responsible for financial management systems in planning, designing, enhancing, modifying, and implementing financial management systems. Managers are ultimately responsible for being knowledgeable of and complying with the various authoritative sources of financial requirements (both legislative and regulatory). Guidance and procedures are contained in several volumes located on the DFAS Reference Library at <http://www.dfas.mil/dfasffmia/bluebook.html>. Appendix 4 of the manual includes links to where authoritative sources of requirements may be accessed.

c. Adherence to these requirements and all other applicable DFAS 7900.4-M requirements will enable DoD military components and agencies to meet Federal mandates and will help facilitate DFAS to progress toward reaching its strategic goal of providing services faster, better, and cheaper. The objective of this Volume is to promulgate the Managerial Cost Accounting specific financial management systems requirements for system and program managers' use in developing Managerial Cost Accounting functionality.

### 2. APPLICABILITY:

Requirements contained within this document are applicable to accounting and finance systems operated and maintained by DoD.

### 3. POLICY:

- a. This Volume provides a synopsis of Federal and DoD financial system requirements, mandated by policy, for Managerial Cost Accounting (MCA) financial management systems. It is a compilation of Managerial Cost Accounting specific financial management systems requirements mandated by Public Law 104-208, “Federal Financial Management Improvement Act of 1996” September 30, 1996.
- b. This Volume incorporates revisions to existing financial system requirements from the authoritative sources **via highlighting the appropriate text in bolded blue font**. See description of requirement changes for a complete listing and description of the financial systems requirements changes, deletions, and additions, for this volume.
- c. Users of this Volume may forward questions, comments and suggested changes to:

#### 4. ORGANIZATIONAL RESPONSIBILITIES FOR FFMIA COMPLIANCE

a. Within DoD, various organizations operate financial management systems. In an overall scheme, many of these systems should be linked in an integrated network. However, these systems frequently “stand-alone” or “stovepipe” systems that are not logically integrated with other related systems. Critical financial data, instead of being transferred electronically between systems through well-controlled interfaces, are often transferred manually by means of journal vouchers, hardcopy spreadsheets, “data calls,” or other inefficient and error-prone methods.

b. DFAS functions as the primary Departmental entity responsible for producing a Trial Balance from the ERP general ledger and preparing the financial reports for the DoD. Much of the data used by DFAS to carry out the DoD’s accounting and financial reporting functions—such as property and inventory values—originate in non-DFAS organizations or systems. Therefore, other organizations, primarily the military services and Defense agencies, should be held responsible for the compliance of their financial management systems with all applicable Federal requirements. Appendix 5 of DFAS 7900.4-M contains Federal and DoD guidance on FFMIA compliance, evaluation, and reporting.

#### 5. PROCEDURES:

Procedures are presented in each Volume of this Manual as appropriate.

#### 6. RELEASABILITY:

UNLIMITED. This Volume as part of DFAS 7900.4-M is approved for public release and may be accessed at <http://www.dfas.mil/dfasffmia.html>

#### 7. EFFECTIVE DATE: This Volume is effective immediately.

## **MANAGERIAL COST ACCOUNTING INTRODUCTION**

1. Reliable information on the cost of DoD programs, operations, and activities is crucial for effective management of the Department. Managerial cost accounting is especially important for fulfilling the objective of assessing an agency's operating performance. Therefore, cost accounting should be a fundamental part of an agency's financial management system and, to the extent practicable, should be integrated with other parts of the system. Cost accounting should use a basis of accounting, recognition, and measurement appropriate for the intended purpose (such as costing of goods to be sold to other parties or costing the operations of a DoD organization). Cost information developed for different purposes should be drawn from a common data source, and output reports should be reconcilable to each other.
2. Cost accounting systems should be fully integrated with other agency systems in order to eliminate unnecessary duplication of transaction entries and to share data elements without re-keying or reformatting. By its nature, a cost accounting system requires more linkages with other agency systems than do most other financial management systems. For example, a cost accounting system needs to accept financial and non-financial (e.g., units) data from the core financial system, inventory system, payroll or labor distribution system, property management system and others. Such data includes but is not limited to labor costs, material costs, depreciation, labor hours, exchange revenues, and number of items produced.
3. Cost accounting standards are published in SFFAS Number 4, Managerial Cost Accounting Concepts and Standards for the Federal Government. In addition, DoD has established cost accounting requirements and processes in its Financial Management Regulation Volume 4. This volume and other DFAS 7900.4-M volumes may be applicable to your system.
