Financial Management Systems Requirements Manual  
Volume 08, Funds Control and Budgetary Accounting

August 2014

---

Strategy, Policy and Requirements

**SUBJECT: Financial Management Systems Requirements  
Volume 08, Funds Control and Budgetary Accounting**

## 1. PURPOSE

a. This Volume presents the financial management system design and implementation requirements for Department of Defense (DoD) military components' and agencies' Funds Control and Budgetary Accounting financial management systems. This Volume is part of the publication which reissues Defense Finance and Accounting Service (DFAS) 7900.4-M, "Financial Management Systems Requirements Manual," commonly known as the "Blue Book." This manual is a compilation of the Funds Control and Budgetary Accounting specific Federal and Department of Defense (DoD) systems requirements. Any system reviews need to consider all DFAS 7900.4-M volumes and requirements in addition to these Funds Control and Budgetary Accounting specific items contained in this volume.

b. The Blue Book serves as a "roadmap" to Federal and DoD financial management system requirements by major financial management functional areas and their authoritative sources, and will assist managers who are responsible for financial management systems in planning, designing, enhancing, modifying, and implementing financial management systems. Managers are ultimately responsible for being knowledgeable of and complying with the various authoritative sources of financial requirements (both legislative and regulatory). Guidance and procedures are contained in several volumes located on the DFAS Reference Library at <http://www.dfas.mil/dfasffmia/bluebook.html>. Appendix 4 of the manual includes links to where authoritative sources of requirements may be accessed.

c. Adherence to these requirements and all other applicable DFAS 7900.4-M requirements will enable DoD military components and agencies to meet Federal mandates and will help facilitate DFAS to progress toward reaching its strategic goal of providing services faster, better, and cheaper. The objective of this Volume is to promulgate the Funds Control and Budgetary Accounting financial management systems requirements for system and program managers' use in developing Funds Control and Budgetary Accounting functionality.

## 2. APPLICABILITY:

Requirements contained within this document are applicable to accounting and finance systems operated and maintained by DoD.

## 3. POLICY:

a. This Volume provides a synopsis of Federal and DoD financial system requirements,

mandated by policy, for financial management systems for Funds Controls and Budgetary Accounting functionality. It represents a comprehensive compilation of financial management systems requirements mandated by Public Law 104-208, “Federal Financial Management Improvement Act of 1996” September 30, 1996.

b. This Manual incorporates revisions to the existing financial system requirements from the authoritative sources **via highlighting the appropriate text in bolded blue font**. See description of requirement changes for a complete listing and description of the financial systems requirements changes, deletions, and additions, for this volume.

c. Users of this Manual may forward questions, comments and suggested changes to:

#### 4. ORGANIZATIONAL RESPONSIBILITIES FOR FFMIA COMPLIANCE

a. Within DoD, various organizations operate financial management systems. In an overall scheme, many of these systems should be linked in an integrated network. However, these systems frequently “stand-alone” or “stovepipe” systems that are not logically integrated with other related systems. Critical financial data, instead of being transferred electronically between systems through well-controlled interfaces, are often transferred manually by means of journal vouchers, hardcopy spreadsheets, “data calls,” or other inefficient and error-prone methods.

b. DFAS functions as the primary Departmental entity responsible for producing a Trial Balance from the ERP general ledger and preparing the financial reports for the DoD. Much of the data used by DFAS to carry out the DoD’s accounting and financial reporting functions—such as property and inventory values—originate in non-DFAS organizations or systems. Therefore, other organizations, primarily the military services and Defense agencies, should be held responsible for the compliance of their financial management systems with all applicable Federal requirements. Appendix 5 of DFAS 7900.4-M contains Federal and DoD guidance on FFMIA compliance, evaluation, and reporting.

#### 5. PROCEDURES:

Procedures are presented in each Volume of this Manual as appropriate.

#### 6. RELEASABILITY:

UNLIMITED. This Volume as part of DFAS 7900.4-M is approved for public release and may be accessed at <http://www.dfas.mil/dfasffmia.html>

#### 7. EFFECTIVE DATE: This Volume is effective immediately.

## **FUNDS CONTROL AND BUDGETARY ACCOUNTING INTRODUCTION**

1. By law (31 U.S.C. 3512), each agency of the Federal government is responsible for establishing and maintaining systems and internal controls to ensure that it does not obligate or disburse funds in excess of those appropriated and/or authorized by the Congress. The primary law governing the apportionment, obligation, and expenditure of appropriated funds can be found in Chapter 15 of title 31, U.S.C., “Appropriation Accounting.” In addition, 31 U.S.C. 1341 and 1517, the Anti-deficiency Act provides criminal penalties for knowingly authorizing or incurring over-obligations or expenditures in excess of budgetary resources. Therefore, an agency’s fund-control system is the primary tool for ensuring that it complies with Congressional spending mandates.
2. An agency may have various systems, such as procurement and travel systems, which affect funds management by committing and obligating funds. These and other systems that affect fund management should access data and use other processes to verify that funds are available, and to update affected balances. Whenever possible and cost effective, these systems should access the funds availability editing activity (of the fund control system) before allowing an obligation to be incurred.
3. For purposes of budget formulation and execution, an agency’s systems of accounting and internal controls should provide information on actual obligations, outlays, and budgetary resources. An agency is required to use United States Standard General Ledger accounts for budgetary accounting and reporting purposes.
4. Requirements for fund control systems are contained in OMB Circular A-136, “Financial Reporting Requirements,” and, to a lesser degree, OMB Circular A-11, “Preparation, Submission, and Execution of the Budget.” set government-wide policies for fund management to which a fund control system must conform. In addition, the Treasury Financial Management Service website at <http://fms.treas.gov/ussgl/> provides comprehensive information and updates for financial reporting requirements.
5. Financial reporting represents the culmination of the various processes that initiate, record, classify, and summarize an agency’s financial transactions. Financial reporting is a proprietary function, not a budgetary function, and the required information may be available as a product of the United States Standard General Ledger (USSGL) and its attributes. However, in keeping with this Manual’s cross-referencing function, financial reporting requirements for both Funds Control and Budgetary Accounting are contained in this Volume. This volume and other DFAS 7900.4-M volumes may be applicable to your system.
