Chart Legend:

A - Added

These are new requirements due to revised and updated source documents.

C - Changed

These requirements were contained in previous releases, but were changed for various reasons.

D - Deleted

These requirements were removed and are no longer required by the source documents.

Note: If there is no code in the requirements value added or change type columns, it is by definition unchanged.

Financial Management Systems Requirements Manual Volume 04, Inventory, Supplies, and Materials

August 2014

Strategy, Policy and Requirements

SUBJECT: Financial Management Systems Requirements
Volume 04, Inventory, Supplies, and Materials

1. PURPOSE

a. This Volume presents the financial management system design and implementation requirements for Department of Defense (DoD) military components' and agencies' Inventory, Supplies and Materials financial management systems. This Volume is part of the publication which reissues Defense Finance and Accounting Service (DFAS) 7900.4-M, "Financial Management Systems Requirements Manual," commonly known as the "Blue Book." This manual is a compilation of the Inventory, Supplies and Materials specific Federal and Department of Defense (DoD) systems requirements. Any system reviews need to consider all DFAS 7900.4-M volumes and requirements in addition to these Inventory, Supplies and Materials specific items contained in this volume.

b. The Blue Book serves as a "roadmap" to Federal and DoD financial management system requirements by major financial management functional areas and their authoritative sources, and will assist managers who are responsible for financial management systems in planning, designing, enhancing, modifying, and implementing financial management systems. Managers are ultimately responsible for being knowledgeable of and complying with the various authoritative sources of financial requirements (both legislative and regulatory). Guidance and procedures are contained in several volumes located on the DFAS Reference Library at <http://www.dfas.mil/dfasffmia/bluebook.html>. Appendix 4 of the manual includes links to where authoritative sources of requirements may be accessed.

c. Adherence to these requirements and all other applicable DFAS 7900.4-M requirements will enable DoD military components and agencies to meet Federal mandates and will help facilitate DFAS to progress toward reaching its strategic goal of providing services faster, better, and cheaper. The objective of this Volume is to promulgate the Inventory, Supplies and Materials specific financial management systems requirements for system and program managers' use in developing Inventory, Supplies and Materials functionality.

2. APPLICABILITY:

Requirements contained within this document are applicable to accounting and finance systems operated and maintained by DoD.

3. POLICY:

a. This Volume provides a synopsis of Federal and DoD financial system requirements, mandated by policy, for Inventory, Supplies, and Materials financial management systems. It is

a comprehensive compilation of financial management systems requirements mandated by Public Law 104-208, “Federal Financial Management Improvement Act of 1996” September 30, 1996.

b. This Volume incorporates revisions to existing financial system requirements from the authoritative sources **via highlighting the appropriate text in bolded blue font**. See description of requirement changes for a complete listing and description of the financial systems requirements changes, deletions, and additions, for this volume.

c. Users of this Volume may forward questions, comments and suggested changes to:

4. ORGANIZATIONAL RESPONSIBILITIES FOR FFMIA COMPLIANCE

a. Within DoD, various organizations operate financial management systems. In an overall scheme, many of these systems should be linked in an integrated network. However, these systems frequently “stand-alone” or “stovepipe” systems that are not logically integrated with other related systems. Critical financial data, instead of being transferred electronically between systems through well-controlled interfaces, are often transferred manually by means of journal vouchers, hardcopy spreadsheets, “data calls,” or other inefficient and error-prone methods.

b. DFAS functions as the primary Departmental entity responsible for producing a Trial Balance from the ERP general ledger and preparing the financial reports for the DoD. Much of the data used by DFAS to carry out the DoD’s accounting and financial reporting functions—such as property and inventory values—originate in non-DFAS organizations or systems. Therefore, other organizations, primarily the military services and Defense agencies, should be held responsible for the compliance of their financial management systems with all applicable Federal requirements. Appendix 5 of DFAS 7900.4-M contains Federal and DoD guidance on FFMIA compliance, evaluation, and reporting.

5. PROCEDURES:

Procedures are presented in each Volume of this Manual as appropriate.

6. RELEASABILITY:

UNLIMITED. This Volume as part of DFAS 7900.4-M is approved for public release and may be accessed at <http://www.dfas.mil/dfasffmia.html>

7. EFFECTIVE DATE: This Volume is effective immediately.

INVENTORY, OPERATING MATERIALS AND SUPPLIES, STOCKPILE MATERIALS INTRODUCTION

1. A Federal agency's Inventory, Supplies, and Materials systems must be designed and implemented to:
 - a. operate in accordance with laws, regulations, and judicial decisions;
 - b. provide timely access to complete, correct, and accurate information to those within and outside of the agency who require the information;
 - c. interact timely and properly with core financial systems; and
 - d. provide adequate internal controls to ensure that the Inventory, Supplies, and Materials system(s) is operating as intended.

2. The Department of Defense is the largest holder of inventory assets in the Federal government, owning and controlling such assets with net values exceeding \$125 billion. The magnitude of the Department's inventory holdings and their significance to financial management and program operations require stringent systems of accountability and control. Inventory systems must be an integral part of the Department of Defense's total financial management system.

3. The Office of Management and Budget (OMB) has published specific accounting requirements for inventories and related assets in Statement of Federal Financial Accounting Standards (SFFAS)-3. SFFAS-3 stipulates that inventories be accounted for at historical cost or with methods which approximate historical costs. The Department of Defense has selected the following cost methods for valuing its inventory and related materials.

- **Inventory**— The Department's policy is that inventory must be valued at historical cost using the MAC flow assumption. However, the Department has also approved, for specific use, the first in, first out (FIFO) and latest acquisition cost (LAC) flow assumptions for calculating historical cost.
- **Operating Materials and Supplies**—Moving average cost (MAC) flow assumption for arriving at historical cost. Historical cost must include all appropriate purchase and production costs incurred to bring the items to their current condition and location. Excess, obsolete, or unserviceable operating materials and supplies must be valued at their estimated net realizable value (NRV).

Stockpile Materials— Stockpile materials must be valued on the basis of historical cost. Historical cost must include all appropriate purchase, transportation and production costs incurred to bring the items to their current condition and location. Abnormal costs must be charged to operations of the period. The DoD standard of using the MAC flow assumption must be applied in arriving at the historical cost of stockpile materials. This volume and other DFAS 7900.4-M volumes may be applicable to your system.
